Best of 50+ Housing Award goes to “The Residence”

The National Association of Home Builders has chosen “The Residence” at the Greens at Cannondale for its 2009 Silver Achievement Award for Assisted Living Residences. Designed to look and feel like a country home, it gives the world of assisted living a new meaning. Spacious, private apartments with beautiful views are designed to appeal to couples or younger people with early onset Alzheimer’s, who need some assistance, but may not want to consider a large institutional setting.

“The Residence” will especially appeal to couples, one of whom needs personal care, while the other can live independently. “The Residence” keeps the couple together, eliminating the need for one spouse to become fulltime caregiver.

Larry Apple, TransCon Builders Vice-President, explained that “The Residence” supplies the missing link in assisted living, a separate building whose residents can take advantage of the adjacent well-established assisted living community. A total “Campus of Care” has been created on fifteen acres of countryside in Wilton, with “The Residence,” the Greens at Cannondale

and Wilton Meadows Health Care and Rehabilitation Center.” The award-winning Residence will be ready for its first occupants in June. Call Barbara Newland for a tour and additional information, 203-761-1191.
